Incident Response Table Top and War Game Exercise

Determine the Effectiveness of Your Incident Response Plan

Benefits

- Validates readiness for an incident by testing in a simulated environment
- Identifies gaps in programs and procedures
- Ensures personnel understand their roles, responsibilities, and procedures
- Allows companies to practice their communication plan
- Instills confidence in management and team members

Every day businesses face ever-changing security risks that could lead to a compromise of confidential and sensitive data. Business leaders know that guarding against an attack requires the development of an incident response plan.

Cylance® Consulting’s Incident Response Table Top and War Game Exercise provides organizations the opportunity to mimic a real-life incident in order to ensure that the incident response plan has all the important elements in place as well as supporting documentation and procedures. The exercise allows organizations to not only test their incident response capabilities, but also gives the opportunity to coordinate across various teams in a nonthreatening, low-stress environment.

Service Overview

The exercise will start with discussions to identify the types of scenarios and key objectives for the project. A draft of a customized cyber incident report will also be reviewed. Once scheduling has been completed, a Cylance IR consultant will arrive on-site to provide a customized exercise for all participants.

Three options are available for conducting an exercise:

- **Crawl** — Introductory-level table top exercise that is primarily presentation-based with real-world scenarios to test the response and capabilities of all participants. Typically 1-3 days.
- **Walk** — For semi-mature response teams, hybrid exercises are a blend of presentation-based scenarios and hands-on problem solving. Typically 1-3 days.
- **Run** — Intended for mature security teams, advanced war game exercises are designed to closely simulate a real-world attack on critical systems or processes. Typically 3-5 days.

Deliverables

Cylance Consulting will provide multiple deliverables to assist in ensuring the incident response program is in place and any opportunities for improvement are well-defined, including:

- Engagement Schedule
- Documentation
- Collection of Cheat Sheets To Leverage During an Incident
- Cybersecurity Exercise Report
- Road Map for Program Enhancement
- Engagement Closure

Ensure your team is prepared for a real-world incident. Contact Cylance Consulting or your technology provider for details.
