

## Benefits

- Leverages Cylance's revolutionary artificial intelligence to instantly provide unparalleled threat visibility
- Fully automated, big-data analysis determines anomalies, correlations, and root cause of compromise activity
- Proprietary and automated tools, processes, and analysis leverage Cylance's artificial intelligence to provide the fastest results in the industry
- Light-weight and quiet scripts provide quick identification of threats, without tipping off the attacker
- Full coverage of every endpoint and server, regardless of OS, ensures no stone is left unturned

Over 28 million personal records were exposed in 2016, stemming from 657 publicized breaches.

Do you truly know whether or not your organization has been compromised? How easily can you identify the extent of a breach? Cyberattacks have become increasingly sophisticated and the sheer number of connected devices presents an unprecedented opportunity for threat actors.

## Service Overview

Cylance<sup>®</sup> Consulting's Compromise Prevention Assessment evaluates your organization's security posture to determine if a breach has happened or is actively occurring. We determine **when, where, and how a compromise occurred and provide tactical and strategic recommendations for preventing another attack**. Cylance takes a preventative approach by integrating our artificial intelligence into the tools and processes we use to rapidly identify threats that bypass an organization's existing security controls.

The assessment is composed of three phases — hunt, investigate, and acquire — and addresses key malicious behavior such as:

- Data exfiltration and sabotage
- Command and control activities
- User account anomalies
- Malware and persistence mechanisms
- Network, host, and application configurations

## Deliverables

Cylance Consulting will provide an executive summary report that details:

- Any compromises detected
- A comprehensive list of findings
- Strategic and tactical recommendations for remediation

How confident are you in knowing whether or not your organization has been compromised? Contact Cylance Consulting or your technology provider to book your Compromise Prevention Assessment today.
