When enterprises initially deploy CylancePROTECT, it is common to find active threats or evidence of previously unknown compromises. An overwhelming amount of work is required to eliminate these threats. For customers with complex environments, minimal staff to manage an implementation, or lengthy testing and rollout processes, ThreatZERO Resident Expert services can help.

When you hire a ThreatZERO Resident Expert, you get a **long-term, highly-trained security professional on-site to help your organization get to a state of PREVENTION quickly and easily.**

Service Overview

A ThreatZERO Resident Expert provides:

- On-site consulting
- Project planning and engagement management
- Deployment and configuration
- Legacy AV rip and replace
- Best practices knowledge transfer and training
- Handling of all malware
- Handling of all potentially unwanted programs (PUPs)
- Policy and zone development
- Movement to Auto Quarantine mode
- Memory protection and exclusion development
- Script and application control
- Full operationalization of CylancePROTECT
- ThreatZERO validation

Once the organization has achieved ThreatZERO status, the Resident Expert will provide the expert staffing needed to keep your company in a state of prevention through:

- Weekly status and trending reports
- Solution operational support
- Product optimization and ongoing security recommendations
- Troubleshooting and on-site support
- Management of CylancePROTECT software upgrades
- Operationalization of new features

Ensure your environment stays in a state of prevention with dedicated on-site resources. Contact Cylance Consulting or your technology provider for details.
