

ARTIFICIAL INTELLIGENCE: A POSITIVE FORCE IN THE ENTERPRISE

For security teams, AI is moving the needle:

70% say their security team is using AI in their threat prevention strategies.

77% say they have prevented more breaches following their use of AI-powered tools.

81% say AI was detecting threats before their security teams could.

78% say the technology has found threats humans couldn't see.

Organizations are already investing in AI, and this will only increase:

60% of the IT decision makers surveyed say they already have AI-powered solutions in place.

40% said they are planning to invest in them in the next two years.

AI is seen as a competitive advantage:

87% see AI-powered technology as a competitive advantage for their IT departments.

83% are investing in AI to beat competitors.

AI brings productivity, meaningful work for employees:

80% believe that teams using AI have become more productive.

81% say AI is critical to the company's digital transformation.

81% say AI will lead to more meaningful work for employees.

Artificial Intelligence is making inroads in enterprises as IT decision makers and other corporate leaders realize the benefits it brings to productivity, digital transformation, employee work satisfaction, and for security in particular, detecting and stopping threats. Companies that wait too long to adopt AI, or at least explore the possibilities with AI, run the risk of losing to faster-moving competitors. With innovation, time is of the essence, and AI is happening now.
